 AB - SU1240038 A steroid derivative, 3-hydroxy-1,3,5-triene-17-hydrazone of
    formula (I) is new.
   - USE - (I) is useful in medicine as it has hormonal and anti-tumour
    activity.
   - ADVANTAGES - (I) is a new steroid derivative of the estran (sic)
    series having increased anti-tumour activity compared with its
    structural analogues of similar action.
 CN - 9732-19401-N
